Experience

Team Member, Appdroid (Lassonde School of Engineering)

- Report documented and summarized team meetings to senior executives;
- Develop promotional advertisements for upcoming events and workshop, e.g. video and posters;
- Market to and inform 100+ potential attendees of upcoming events and workshops;
- Manage and assist with organizing and running web & mobile application development events and workshops with 20+ attendees.

Projects

Fridgeful   February 2020
3rd place, Ellehacks 2020

Android mobile and Google Assistant application created with **Android Studio**, **Java**, and **Voiceflow**. The app tracks fridge inventory, organizes items based on expiration date, and suggests recipes based on nearest expiration dates, to induce users to reduce food waste.

PicEdit   August 2019

Web-based application created using **HTML**, **CSS**, and **JavaScript**. Users can upload images from their local computer and edit photos using function tools.

Education

Bachelors' in Computer Science:
York University
2017 - Janauary 2020
